

CHEM+NECT™

100L Closed-System Disso Media

Ready-made reagents that expand your throughput.

Release more finished product by eliminating prep work and making your analysts' time more productive. CHEM+NECT 100L pre-packaged dissolution media – available off-the-shelf or custom made – supply the consistency, stability, and safety you need for your dissolution media, and provide the increased throughput that helps your lab reach its full potential.

Off-the-Shelf Dissolution Media in 100L CHEM+NECT System:

Item	Description	List Price	Stability Data
56095	0.1N Hydrochloric Acid	\$297.21	18 Month Expiration
56706	0.1N Hydrochloric Acid, pH 1.10	\$297.21	18 Month Expiration
56299	0.01N Hydrochloric Acid	\$297.21	18 Month Expiration
56290	0.06N Hydrochloric Acid	\$297.21	18 Month Expiration
56203	Simulated Gastric Fluid, pH 1.20*	\$304.09	12 Month Expiration
56275	Simulated Intestinal Fluid, pH 6.80*	\$324.35	12 Month Expiration
56639	0.05M Potassium Phosphate Buffer, pH 6.80	\$324.35	12 Month Expiration
56436	0.05M Potassium Phosphate Buffer, pH 7.20	\$324.35	12 Month Expiration
56268	0.05M Potassium Phosphate Buffer, pH 7.40	\$324.35	12 Month Expiration
56444	Sodium Acetate Buffer, pH 4.50	\$352.26	12 Month Expiration
56468	0.05M Sodium Phosphate Buffer, pH 6.80	\$354.71	12 Month Expiration

*Without Enzyme

NOTE: Volume allowances may be available based upon total number of 100L drums of off-the-shelf dissolution media purchased during the 2009 calendar year. Pricing listed above is current as of 12/1/2008. Prices are subject to change. QC testing reported on the Certificate of Analysis may vary from product to product. Dissolution media contained in CHATA's 100L CHEM+NECT closed-system have been filtered through a 0.2µm filter, but are not degassed by helium sparging. You may contact us at any time for information on volume allowances and product availability, including custom blended solutions.
