

CHEM+NECT™ Dissolution Media

Ready-made reagents that expand your throughput.

Release more finished product by eliminating prep work and making your analysts' time more productive. CHEM+NECT 100L pre-packaged dissolution media – available off the shelf or custom-made – supply the consistency, stability and safety you need for your dissolution media, and provide the increased throughput that helps your lab reach its full potential.

CHATA

Release more finished product.

Leave your reagent preparation to CHATA, and watch your lab's throughput take off. Rather than spending time inefficiently preparing solutions each day, your analysts can instead use convenient CHATA CHEM+NECT dissolution media and focus on testing more finished product. Manufactured according to the same exacting standards as our CHEM+NECT HPLC mobile phases, our dissolution media are available in a wide variety of off-the-shelf solutions, as well as custom-made to suit your specific needs.

Trust quality and consistency.

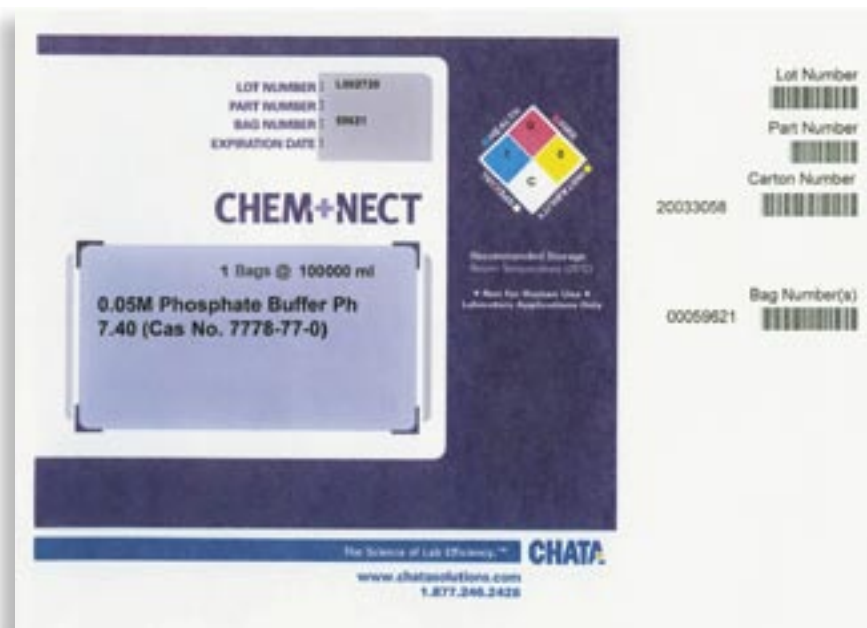

Say goodbye to errors in reagent preparation, and implement a higher standard for consistency in your lab. All CHEM+NECT dissolution media ensure precisely prepared reagents that will improve the accuracy of your results. We manufacture our dissolution media following GMP guidelines in a class 10,000 clean room, and we can tailor our protocols to match your specifications. Additionally, we

include a detailed Certificate of Analysis with every product we manufacture. We can also perform a full range of quality control tests on the finished product including pH, ion analysis, UV scan, sterility, and endotoxin testing. With CHATA, you can be certain of stable, top-quality solutions that will provide you with the highest consistency for your finished product testing.

Improve productivity and reduce your operating costs.

Beyond freeing your analysts from the preparation area, using CHEM+NECT dissolution media can eliminate costly non-conformance investigations and expensive reworks throughout your lab. Think about it: with CHATA, you can make sure that your finished product is shipped on time, every time. Don't pay for delayed shipments again. By simply supplying the convenient, safe, and consistent CHEM+NECT media from the 100L drums, your analysts can begin producing dissolution test data almost immediately, with results that you know you can trust. Be sure that your lab operates as productively as it should. Rely on CHEM+NECT dissolution media from CHATA.

Expand your throughput with CHEM+NECT Dissolution Media.

What's in the drum?

We supply a wide variety of off-the-shelf media (see table below), as well as other standard media manufactured according to our strict guidelines. We also manufacture custom dissolution media, including surfactants, prepared to meet your specifications. We ensure convenience and accuracy with just one glance. Just look at the label on every

CHEM+NECT drum to see all that you need to know about your dissolution media.

All CHEM+NECT dissolution media feature labels printed with the Lot Number, Part Number, Bag Number, Product Name, Volume, Product Composition, CAS Numbers, HMIS codes, Expiration Date and CHATA contact information.

What's included in the CHEM+NECT dissolution media system?

From drum caddies that ease transporting our drums, to electrical pumps that sit atop the drum to deliver a constant reagent supply, to quick-connect fittings that allow easy plumbing directly to automated systems, our patented CHEM+NECT dissolution media systems include all the equipment you need to ensure desired consistency, increased efficiency, and greater convenience from your dissolution media.

How much time will my lab save?

Typically, analysts can spend up to 2.5 hours or more every day preparing dissolution buffers. With CHEM+NECT dissolution media, you can reduce that time to just minutes.

What delivery arrangements can I expect?

CHATA offers several delivery and warehousing options to maximize the benefits of using CHEM+NECT dissolution media. Contact our customer service group to arrange for just-in-time delivery, and inquire about our excess media storage.

Contact CHATA today.

Call us, or visit our web site, and find out more about how you and your team can spend your time performing science instead of making dissolution media. Join the growing number of laboratories around the world who have realized the timesaving benefits of CHEM+NECT dissolution media systems.

Available Off-the-Shelf Media

ITEM NUMBER	DESCRIPTION	STABILITY DATA
56095	0.1N HCl	18 month expiration
56299	0.01N HCl	18 month expiration
56290	0.06N HCl	18 month expiration
56203	Simulated Gastric Fluid*	12month expiration
56275	Simulated Intestinal Fluid*	12 month expiration
56639	0.05M Potassium Phosphate Buffer, pH 6.80	Stability study initiated 4.06
56436	0.05M Potassium Phosphate Buffer, pH 7.20	12 month expiration
56268	0.05M Potassium Phosphate Buffer, pH 7.40	12 month expiration
56444	Acetate Buffer, pH 4.50	12 month expiration
56468	0.05M Sodium Phosphate Buffer, pH 6.80	12 month expiration

NOTE: Stability and QC tests offered may vary from product to product. You may call us at any time for information on our current list prices and product availability.
